

Sushil Harsana

SOFTWARE DEVELOPER · BACKEND & GENERATIVE AI

Dehradun, India | sushil23harsana@gmail.com | +91 91060 14404 | github.com/sushil23harsana | linkedin.com/in/sushil-harsana-2b604b258

SUMMARY

Product-minded software engineer who builds full-fledged, AI-native SaaS products end-to-end — owning backend architecture, distributed systems and the Generative-AI infrastructure behind them. Strong in Go and Python; experienced shipping high-throughput services, async pipelines and LLM/RAG-powered features to production.

TECHNICAL SKILLS

Languages	Go, Python, TypeScript / JavaScript, SQL
Backend & APIs	FastAPI, Django, Celery, Node.js, REST, microservices, RabbitMQ, rate limiting
AI & Data	Generative AI, LLM integration, RAG / retrieval pipelines, LangChain, prompt design
Databases	PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps	AWS, Docker, Linux, Git, CI workflows, Next.js

EXPERIENCE

Altrd AI — Software Developer

Apr 2026 – Present

- Build AI-native SaaS products end-to-end with **Python** and **Next.js**, owning both the application layer and the AI infrastructure.
- Shipped an **AI billing-reconciliation platform** with an automated discrepancy-detection engine that classifies and surfaces billing mismatches, replacing manual line-by-line audits.
- Built a **real-estate lead-intelligence platform** with an intelligent lead pipeline (health/intent scoring) and an **AI voice agent** automating first-touch outreach and follow-ups.

Seller Setu — Software Engineer

Oct 2025 – Mar 2026

- Built and optimized **Golang** backend services and RESTful APIs with stronger request validation, error handling and response consistency.
- Tuned handler and API logic to improve performance and reduce backend failures; deployed and managed Go services on **AWS** across stable releases.

Resollect — Software Engineer (SDE-1)

Jun 2025 – Sep 2025

- Architected and maintained core backend modules for a lawyer-operations platform using **Django** and **Celery**, handling critical business workflows.
- Designed **asynchronous task-processing** systems for background jobs and third-party integrations; resolved production incidents and reduced downtime with robust error handling.

Seller Setu — Software Engineer Intern

Mar 2025 – May 2025

- Migrated core API-gateway components from **Django** to **Golang**, significantly improving response times under high-traffic load.
- Implemented rate limiting and traffic control for resilience at peak load, and integrated **RabbitMQ** for reliable inter-service communication across a distributed microservices architecture.

PROJECTS

BitTorrent Client — Go

Nov 2025 – Dec 2025

- Engineered a peer-to-peer file-sharing client from scratch — bencode parser, tracker protocol, and **concurrent piece-based downloads** with SHA-1 integrity verification using Go goroutines & channels.

Personal Finance Manager — GenAI Backend

Mar 2025 – Jul 2025

- Built backend services generating insights from user data via **GenAI-assisted retrieval**; implemented LLM-backed summarization and insight workflows with FastAPI, focused on reliability and structured data handling.

EDUCATION

B.Tech, Computer Science2021 – 2025
Graphic Era University, Dehradun · GPA 7.6 / 10

ACHIEVEMENTS

- Cluster Finalist, Tata Crucible Campus Quiz 2024** — India's largest business quiz (1.2 lakh+ student participants nationwide).
- Tech Team Lead, Designovation Hub** — led technical operations and organized hackathons & tech events for 300+ students.
