ACADEMIC DETAILS

Year	Degree/Exam	Institute	GPA/Marks(%)
Nov, 2021 - June 2025	B.TECH in Computer Science	Graphic Era University Dehradun	7.6 /10.0

WORK EXPERIENCE

- Seller Setu - Software Engineer** *October 2025 - Present*
 - Developed and optimized Golang backend services, improving code quality and maintainability.
 - Built and refined RESTful APIs with better request validation, error handling, and response consistency.
 - Optimized API and handler logic to improve performance and reduce backend failures.
 - Deployed and managed Go services on AWS, supporting stable releases and environment updates.
- Resollect - Software Engineer (SDE-1)** *June 2025 - September 2025*
 - Architected and maintained core backend modules for a lawyer operations platform using Django and Celery, handling critical business workflows.
 - Designed and implemented asynchronous task processing systems for background jobs and seamless third-party service integrations.
 - Diagnosed and resolved production incidents, enhancing system stability and reducing downtime by implementing robust error handling.
- Seller Setu - Software Engineer Intern** *Mar 2025 - May 2025*
 - Optimized performance by migrating critical API gateway components from Django to Golang, significantly improving response times under high-traffic conditions.
 - Implemented sophisticated rate limiting and traffic control mechanisms to ensure system resilience during peak loads.
 - Integrated RabbitMQ messaging system for reliable inter-service communication across distributed microservices architecture.

PROJECTS

- BitTorrent Client - Go** *Nov 2025 - Dec 2025*
 - Engineered a fully functional BitTorrent client from the ground up in Go, implementing peer-to-peer file sharing protocols.
 - Built concurrent download mechanisms with piece-based transfer logic and SHA-1 integrity verification for data reliability.
 - Applied distributed systems principles, network protocol implementation, and advanced Go concurrency patterns (goroutines, channels).
- Personal Finance Manager (Backend Focus)** *Mar 2025 - Jul 2025*
 - Built backend services for a finance analysis system that generates insights from user data using GenAI assisted retrieval techniques.
 - Implemented LLM-backed workflows for summarization and insight generation, focusing on prompt handling and API integration.
 - Designed APIs and backend workflows for data ingestion, processing, and response generation.
 - Focused on backend reliability, service orchestration, and structured data handling.

TECHNICAL SKILLS

- Languages & Backend:** Golang, Python, Django, FastAPI
- Databases:** PostgreSQL, MySQL, Redis
- Messaging & Tools:** RabbitMQ, Docker, Git, Linux, Postman

CERTIFICATIONS & ACHIEVEMENTS

- Tata Crucible Campus Quiz (2024):** Cluster Level Finalist among thousands of participants.
- Tech Team Lead, Designation Hub:** Led technical operations and successfully organized hackathons and technical events for 300+ students.
